RECOMMENDATION LETTER TO Mr. JIRI HERMAN

September 1, 2019

To Whom It May Concern

I am writing this letter as a staff of Cardiology and Vascular Medicine Department, Faculty of Medicine Universitas Andalas, Padang Indonesia, and also as a supervisor of international exchange program for medical students in research and professional exchange.

I would like to state that Jiri Herman had attended cardiology internship in research exchange including active participation in a research program : Effect of Remote Ischemic Postconditioning on miRNA-145, Troponin I levels and Left Ventricular function in STEMI patients undergoing primary percutaneous coronary intervention. Me and Jiri worked aside between the 1.7.2019 and 31.7.2019. During this period he has actively attended different procedure as an observer on daily basis and has also observed laboratory work at our biomedics department. He fulfilled all the agenda that I had given, was always on time and was very reliable when given a task. I can sincerely say that he is a hard-working and ambitious person, enhanced with good communicating skills both with the doctors and the patients. Working with him was an enjoying moment for me and for his team. He stayed at a host-family for one month. During his staying I could say that he showed a very good attitude and made a very good bounding with his host-family. Furthermore, he also showed a positive open minded and mutual understanding toward his totally new experience in Islamic and Minangkabau culture, which I really appreciated so much.

I believe, Jiri will become a good doctor in any specialties that he would like to choose as a path of his life. Any helps to enrich his experience to be a better doctor is much appreciated.

Sincerely,

Supervisor of International exchange program for medical students in research and professional/
CIMSA

Faculty of Medicine, Universitas Andalas.
